CRN: 43302

In accordance with the guidelines published by the Institute of Electrical Engineers and the Health Safety Executive, the following has been adopted as an ongoing strategy for the maintenance of portable electrical appliances on this site.

Type of appliance	Location	Frequency	Test / Inspection
All Class 1	All Uses	Annual	Test
Class 2	Low Risk Use	Annual	Inspection
Class 2	High Risk Use	Annual	Test

Notes:

The above forms the basis of the strategy. It may be varied for specific appliances or locations as dictated by the risk assessment made at the time of testing.

Health and Safety is the responsibility of ALL members of staff, and all users of electrical equipment must be encouraged to carry out User Checks (simple visual inspections) on a regular basis, reporting any signs of damage or disrepair to the Responsible Person.
